WE BOND DIFFERENTLY

In 1993, RS Industrial, Inc. began as a regional distributor. Today, as an international distributor and manufacturer of industrial adhesives and tapes, we desire to set a new standard of adhesion, innovation and service.

Dedicated service is always available. As the backbone of RS Industrial, we never forget our customers pay our checks. If you need glue, you can depend on us—no matter the situation. Our Right Glue/Right Now inventory management system is just one of the many examples of our desire to serve you and reduce your operating costs.

Technically trained analysts are a key component of our value-added service team. When you contact us, you consult with an adhesion expert trained to optimize your overall production efficiencies.

Quality products are critical to ensuring effective on-site trials. All of our products have been value tested and performance screened by our on-site lab. Plus, our ability to offer both national and proprietary brands makes us a forerunner in today's competitive adhesive industry.

Innovative ideas are key to adhesion advancement, and we are committed to developing them every day. From an eco-friendly solution for a small business owner down the street to an international trial for a major food distributor, you receive a cost-saving, competitive advantage.

YOUR TECHNICAL EXPERTS

Are you looking to decrease the cost-per-thousand units on your production line? We'll help you accomplish this and more by joining your team in your facility and analyzing your options from top to bottom.

Machines/Application:

We consider your existing machinery, your application speed and method, the adhesive you use, and your process requirements, such as curing time and temperature.

Substrates:

Whether you're bonding foam or metal, we'll find or create an adhesive that works based on your material selection.

End Use Requirements:

Maybe your final product needs to be water resistant or hold up against extreme temperatures. We'll choose an adhesive that's designed to meet those requirements.

Cost:

We offer our qualified solutions based on your total process cost, taking into account shipping, your monthly volume, purchase frequency and more. We'll optimize your production process while cutting costs.

Plant Conditions:

We understand that every facility is different. Ambient temperatures, seasonal changes and environmental limitations can affect the performance of your adhesive, which is why we consider these factors during product selection.

HOT MELTS

We have the perfect hot melt for your application. Our extensive selection of hot melts includes low temperature (250°F), standard (350°F), metallocenes and low temperature metallocenes. These application-specific adhesives offer reduced product failure rates and returns, which hurt your bottom line.

Solutions:

- Case & Carton
- Food & Beverage Packaging
- Product Assembly
- Foam Bonding/Bedding
- Consumer Packaged Goods

WATER-BASED

Increase your production without having to compromise quality. We offer dextrans, emulsions and polymers that provide an economical solution while displaying excellent resistance to temperature extremes. Fast set speeds and excellent surface coverage increases production rates and mileage. This leads to more efficient production.

Solutions:

- Labeling
- Folding Carton
- Glued Lap
- Layflat Laminating
- Woodworking

GLUE STICKS

We carry a wide variety of high-performance glue sticks. This custom selected line provides fast lay down, aggressive tack and precise beading, depending on your specific application. We are here to work with you to find the best glue stick to maintain the brand integrity of your product.

Solutions:

- Point of Purchase Displays
- Contract Packaging
- End of Line Repairs
- Product Assembly
- Furniture

TAPES

Regardless of your application, we have a tape that's manufactured to fit your needs. We carry a full selection of transfer tapes, ATG tapes, double-coated tapes, HB tapes and custom specialty tapes. When you need reliable adhesion, our range of tapes is unmatched.

Solutions:

- Carton Sealing
- Contract Packaging
- Insulation
- Point of Purchase Displays
- Graphics

STRUCTURAL

Meet your high-speed production and assembly needs with our full collection of structural adhesives. We offer instant adhesives, epoxies, methacrylates, sealants and threadlockers. Our structural adhesives will bond a variety of materials, such as plastics, metals and ceramics.

Solutions:

- Automotive
- Product Assembly
- Stabilization
- Graphics
- Medical

PSAs

Whether your application requires permanent or temporary adhesion, we offer an extensive range of pressure-sensitives designed to fit your needs. Our inherently tacky PSAs are available in hot melt or water-based form, and bond almost any substrate.

Solutions:

- Labeling
- Packaging Materials
- Graphics
- Medical
- Direct Mail

ADHESIVE SQUARES™

Adhesive Squares™ provide 27% more substrate surface area contact than a circle, offering more gripping power per square inch. Engineered with PEAP™ Technology, each square, strip or patch is designed to a uniform thickness, resulting in a stronger and more consistent adhesion than can be obtained through other curved surface dots.

Solutions:

- Product Assembly
- Contract Packaging
- Point of Purchase Displays
- Inserts/Outserts
- Foam Bonding/Bedding

GLUEGLIDER MAX™ & ONE™

Increase your assembly line speed with our ergonomically designed GlueGlider ONE™ and GlueGlider MAX™. These adhesive transfer guns are designed to dispense Adhesive Squares™ cartridges in various profiles and tack levels. Each interchangeable cartridge offers controlled application of adhesive in exactly the right place.

Solutions:

- Packaging
- Food & Beverage
- Printing
- Point of Purchase Displays
- Direct Mail
