

★ Spotlight on ★ ADHESIVES IN FILTER ASSEMBLY

Commonly found FILTERS

Air Filters

Oil Filters

Fuel Filters

Filters like these can be manufactured using CYANOACRYLATE ADHESIVES

Cyanoacrylates are **fast-setting, one-part adhesives** that instantly bond many materials:

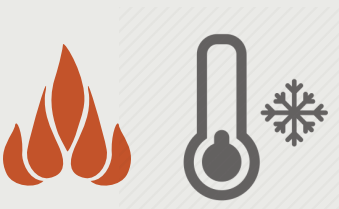

RUBBER
FOAM
METAL
WOVENS
NON-WOVENS

Different types of adhesives may be used for various filter components, but **cyanoacrylates are frequently used to bond rubber gaskets onto the filter.**

Cyanoacrylates ensure mats meet RIGOROUS DEMANDS

Heat & Cold Resistance

Solvent & Chemical Resistance

Tensile Strength
